Experiment No. 9

Aim : Implement localStorage and sessionStorage to save user preferences like theme settings.

Software / Tools Required:

1. Visual Studio Code / Antigravity IDE
2. Google Chrome
3. HTML5
4. JavaScript

Theory: localStorage and sessionStorage are Web Storage APIs provided by JavaScript to store data in the browser.

a) localStorage:

Data stored using localStorage remains available even after the browser is closed and reopened.

b) sessionStorage:

Data stored using sessionStorage remains available only for the current browser session and is removed when the session ends.

c) Theme Preferences:

Web Storage can be used to save user preferences such as light or dark theme and retrieve them when required.

Case Study Implemented:

Create a Schedule Planner for the given table and show an Alert Box on the Click Event.

The schedule planner contains the seminar schedule for different days along with the beginning time, ending time, and topic.

The schedule includes:

- Monday: 8:00 a.m. – 5:00 p.m. — Introduction to XML and Validity: DTD and Relax NG
- Tuesday: 8:00 a.m. – 11:00 a.m. — XPath
- Tuesday: 11:00 a.m. – 2:00 p.m. — XSL Transformations
- Tuesday: 2:00 p.m. – 5:00 p.m. — XSL Transformations
- Wednesday: 8:00 a.m. – 12:00 p.m. — XSL Formatting Objects

An alert box is displayed when the user clicks on the required schedule/event.

Conclusion: The practical was completed successfully. The concepts of localStorage and sessionStorage were studied for storing user preferences. A schedule planner was also implemented using HTML and JavaScript, with an alert box triggered through the click **event to display schedule information.**
